# Process Modelling of Fluid Bed Granulation

25-26 April 2017, London Advanced Process Modelling Forum Sushil Shirsath (RCPE) Martin Maus (Boehringer Ingelheim) Robert Schmidtke (Boehringer Ingelheim)

#### Opportunities of Process Modelling

- Understand a particular process phenomenon
- Design of optimized standard formulations and manufacturing processes
- Support of scale-up by simulation
- Meeting future expectations of regulatory agencies (Experimental and Simulation, effort increased)

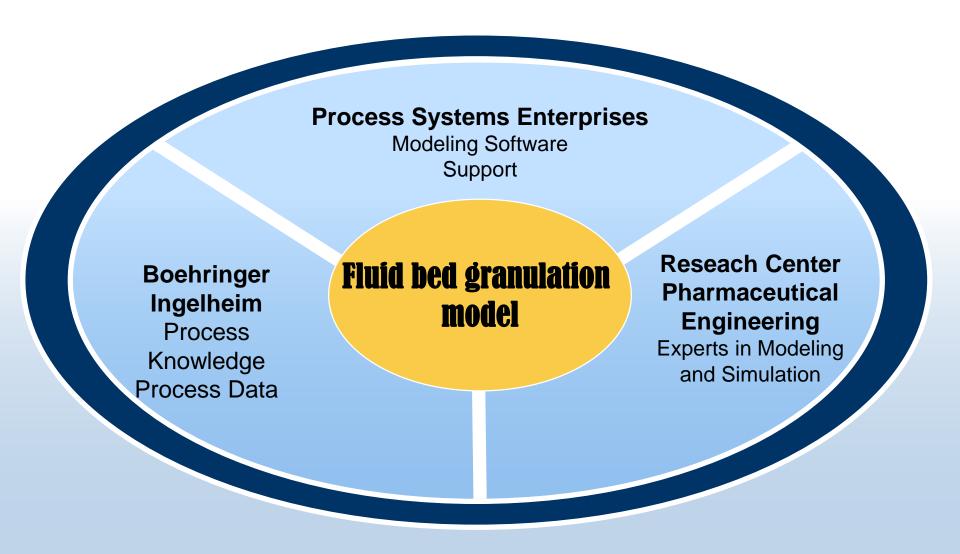

#### Predict process outcome based on reduced experimental

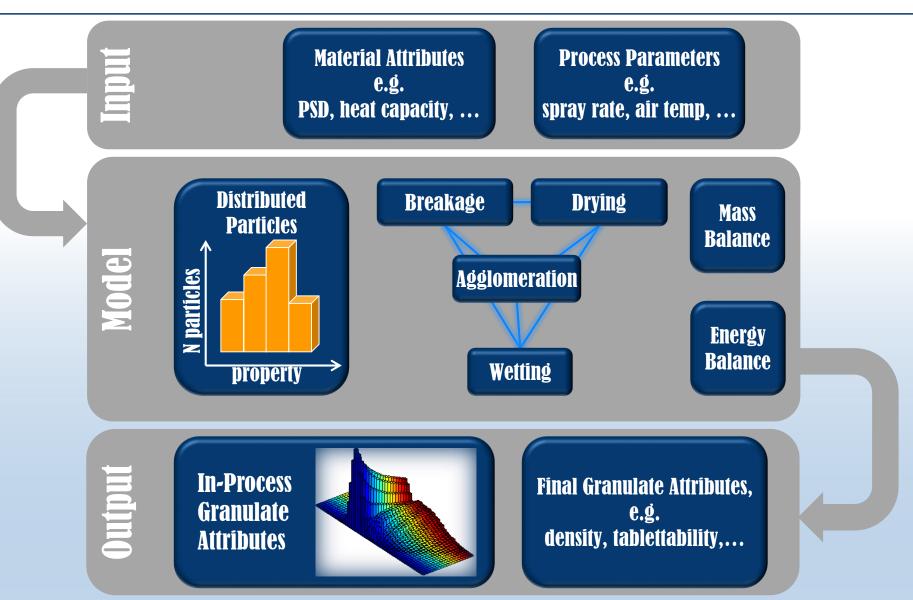

effort

### **Project Partners**

#### Model Structure - Fluid Bed Granulation

## Process modelling current and future opportunities

	Dry granulation	Twin screw granulation + drying	Fluid bed granulation
Scope	Applicability of present models of gSolids	Determination of mass flow for continous processing	Development of a new model
Status	Data collected	Planned	Results
